Introduction & Annual Theme

Introduction

The Primary Market Summit aims to inspire and empower the next generation of leaders by fostering connections and sparking innovative conversations.

This year, we are excited to host our inaugural Summit, a unique event that blends a dynamic forum with a relaxed social networking event. We are honored to invite distinguished industry professionals to engage with more than 200 of our members, offering invaluable guidance and sharing their expertise. Through an array of insightful panel discussions, interactive roundtable sessions, and networking opportunities, this event is designed to stimulate meaningful dialogue. Our goal is to bridge the gap between the academic and the professional world, providing university students with a deeper understanding of industry trends and helping them shape their aspirations for future careers.

AI Horizons:

Navigate Taiwan's M&A and Tech Sector in the Age of Artificial Intelligence

Artificial intelligence is not merely a technological advancement; it catalyzes economic growth, heralding a significant transformation in the business landscape. Recent estimates suggest that investments in AI substantially increase global GDP, with potential contributions reaching trillions of dollars by 2033. In Taiwan, where the semiconductor industry is a foundational element of the economy, AI is poised to play a crucial role in fostering innovation and enhancing competitiveness. The semiconductor market is currently experiencing rapid growth, driven by advancements in AI technologies that are vital for the development of cutting-edge devices.

As we engage in discussions about navigating these transformative changes, participants will gain valuable insights into how AI is reshaping the business environment, particularly from the perspective of primary markets. The summit will feature expert panels that will focus on strategic acquisitions within the AI sector, emerging investment trends, and the efforts of AI hardware leaders to promote the integration of hardware and software within Taiwan's technology ecosystem. Attendees will have the opportunity to interact with industry pioneers who are at the forefront of advancements in AI and mergers and acquisitions strategies.

We invite you to join us on this journey as we navigate the future of Taiwan's M&A landscape in the era of artificial intelligence.
